Done

This file is "key" to finding and reading the data on the Data Disc. The correct file name for the data is listed at the top of the page (P2001015). And the definition or heading for each column is given. You will notice that it defines Column 1 as "Page 7, Line 1, Column Net Premiums Written". This why you need the copy of the page from the Data Element Guide – to find out what Line 1 is. In this case, Line 1 is the Line of Business: Fire.

Now the Data Disc can be used. You know which file to open based on the information from the Record Layout Disc – in this case P200115.xpt – once the file is open the data can be read using the key from the Record Layout and the form from the Data Element Guide.

Data prior to 2007 is in SAS format and data from 2007 forward is in Excel format.
